

Hytec Automotive

NEW 70,000 Square Foot China Manufacturing Plant
TS-16949 Certified Water Pumps

Driven to Supply the World...

Hytec Automotive is pumped to compete globally with its new TS-16949 NQA-certified manufacturing plant in Dafeng City, China. In a joint venture with Hytec Automotive USA, Jiangsu Chantey Hytec Automotive Pumps, LLC is buzzing with capacity to produce 2.8 million water pumps annually.

Jiangsu Chantey Hytec Automotive Pumps, LLC brand new facility

Chantey Hytec is ranked first in China for water pump production. Die casting, machining and assembly are the primary operations of the manufacturing plant, which specializes in producing automotive, heavy duty, industrial and marine water pumps. Excluding seals and bearings, all critical components required to

produce new water pumps are manufactured at the facility. Exceptional quality control is in place to meet or exceed OEM specifications.

Dedication to excellence and rapid growth are shaping a prosperous future where rich culture and history meet modern civilization. The China plant's unique transportation advantages and convenience to the international marketplace position Hytec Automotive to lead the world's automotive aftermarket industry.
